Laravel Developer Task Description (Web CRUD Module)

📌 Task Overview

Your task is to build a **Team & Agent Management Module** using **Laravel** (Blade Web App only).

This module should demonstrate core Laravel fundamentals:

- Web routes (no API endpoints)
- MVC structure
- CRUD operations
- FormRequest validation
- Middleware
- Blade templating
- Migrations & Eloquent ORM
- Clean UI/UX using Blade views (tables, forms, detail pages)

📂 Database Schema

1. Teams Table

Column	Type
id	integer (PK)
name	string
description	text

status	tinyint (0/1)
timestamps	created_at, updated_at

---

2. Agents Table

Column	Type
id	integer (PK)
team_id	foreign key (teams.id)
name	string
email	string (unique)
phone	string
status	tinyint (0/1)
timestamps	created_at, updated_at

🛠️ CRUD Requirements

Team Module

- Team List Page
- Create New Team
- Edit Team
- Delete Team
- View Team Details

Agent Module

- Agent List Page

- Create New Agent
- Edit Agent
- Delete Agent
- View Agent Details

✔️ Validation Rules (FormRequest)

Team Validation

- `team_name` → required, min: 3 characters
- `status` → required

Agent Validation

- `agent_name` → required, min: 3 characters
- `email` → required, unique
- `phone` → required
- `team_id` → required

🔐 Middleware Requirement

Create a middleware named **CheckAdminAccess**, which:

- Allows access **only** for users with **role = admin**
- Other users should be **redirected** with an error message (e.g., “Access denied”)

🎨 Blade UI Requirements

Create simple, clean, and responsive UI using **Bootstrap** or **Tailwind**.

Team Pages

- Team List (table view)
- Create Team (form)
- Edit Team (form)
- Team Details Page

Agent Pages

- Agent List (table view)
- Create Agent (form)
- Edit Agent (form)
- Agent Details Page

UI Elements

- Section titles
- Proper spacing & alignment
- Buttons for:
    - Create
    - Edit
    - Delete
    - Back
